

Escondido Union School District automates 8 approval workflows in 3 months using Live Forms

The District realized that faculty and staff were wasting time and resources printing, scanning and emailing PDF/paper forms for signatures.

With frevvo Live Forms, the approval workflows are now online. Supervisors can approve and sign anytime, anywhere and from any device.

They chose frevvo over SharePoint for their approval workflows due to ease-of-use and the ability to meet business requirements at a fraction of the cost.

Customer Profile: EUSD is a Pre K-8 school district in California committed to providing quality learning experiences and a supportive environment for over 17,000 students.

Business Situation: The District had a number of PDF and paper forms for absence records, mileage reimbursement, and state and federal reporting that were being filled, printed, and hand-delivered for approvals & signatures. Their desire to address these inefficiencies resulted in an exhaustive evaluation of numerous web-based workflow systems.

“Our primary concerns are always adoptability and simplicity. There are many workflow solutions on the market but none offers the balance of simplicity and flexibility found in frevvo.

Live Forms is the best web-based workflow solution on the market today”

Mike Malone,
Director of Technology

Solution Summary: Using frevvo Live Forms, the school district has automated 8 approval workflows including Absence Records, Mileage Reimbursement, and Budget Transfers online in the first three months. The District chose frevvo Live Forms over implementing these in an existing SharePoint install because it provided an easy-to-use solution that fully met business requirements at a fraction of the cost. In fact, EUSD decommissioned SharePoint as a result of their success with frevvo!

Benefits:

- Faculty and staff save time by eliminating the need to print/scan for signatures.
- Extensive use of frevvo’s built-in validation and business rules has dramatically reduced issues and the need for corrections.
- Live Forms works with their existing Active Directory so credentials and permissions can be retained in a single place.
- frevvo works on mobile devices enabling supervisors to approve and sign requests anytime and anywhere.
