

## Hellmann Worldwide Logistics (UK) automates 9 approvals in 4 months using Live Forms.

Hellmann Worldwide Logistics realized that employees spread out in multiple locations waste time and resources printing, signing, scanning and emailing documents for signatures & approvals.

They also wanted to track approvals in order to improve operations efficiency.

They chose frevvo Live Forms because it's an easy-to-use, affordable solution that works in the Cloud and meets complex business requirements. Electronic workflows are also much easier to visualize compared to paper.

**Customer Profile:** Hellmann Worldwide is the leading global logistics provider in terms of service excellence, quality, innovation and environmental care, with a worldwide network of 19,300 people in 443 branches in 157 countries.

**Business Situation:** The Company was using a number of paper and PDF forms for things like contract amendments, credit amendment request, new customer credit approvals and cost allocation that were being filled, printed and hand-approved. They wanted to address these inefficiencies by automating workflows and, as a result, evaluated numerous cloud-based systems for their needs.

"We're always looking for ease-of-use and simplicity. Live Forms has the best combination of usability and business capabilities on the market today.

We've used Live Forms in the Cloud to automate several workflows in a matter of months and we were able to do it ourselves without expensive consulting resources."

**James Darlston**  
UK Business & IS Solutions Manager

**Solution Summary:** Using frevvo Live Forms, Hellmann has already automated 9 approval workflows including Credit Authorization, Cost Allocation, and Recruiting Authorization online in the first four months. They chose frevvo Live Forms because it provided an easy-to-use, cloud-based solution that was secure and met business needs. I.T. staff at Hellmann were able to quickly create forms and workflows without lengthy and expensive development effort or consulting resources.

### Benefits:

- Supervisors can sign and approve electronically at any time from any location.
- Live Forms is available in the cloud, requires no setup and installation and works with our existing web browsers.
- Automatic validation and business rules prevent errors and duplicate data entry.
- Hellmann can visualize and track misallocated costs so they don't happen again which directly saves money.
- Built-in mobile means managers can authorize anytime, anywhere and from any device.
