

Automated Internship Application approval workflow saves precious time for UC Davis students & faculty

The Department of Animal Sciences realized that students and faculty were wasting valuable time getting internship applications approved in person.

With frevvo Live Forms, the approval workflow is now online. Students can fill it out online and faculty can approve and sign anytime, anywhere and from any device.

frevvo generates PDFs from the approval workflow and saves them online for easy access and reporting.

Customer Profile: Located in Davis on the largest University of California campus, UC Davis is known for its commitment to sustainability, standout academics and unmatched school spirit.

UC DAVIS
UNIVERSITY OF CALIFORNIA

Business Situation: The Department of Animal Science offers several internships to students. The process for applying was manual, time consuming and required the student to meet multiple field supervisors, faculty sponsors and advisors to collect signatures/approvals. When any one of them was traveling, the approval was delayed. Further, the applications were paper documents stored in filing cabinets that were hard to locate and report on.

“The online internship application approval workflow is easy and effortless for students, faculty, supervisors and advisors.”

frevvo has been easy to work with, responsive and has provided us with excellent support. We would recommend this system for any academic department looking to automate their approval workflows.”

Abbas Ahmadi, MS, MSPH, PhD
Department of Animal Science

Solution Summary: Using frevvo Live Forms, the Department has now has all internship applications online. Field supervisors and faculty sponsors can approve and sign online whether they are in Davis or anywhere in the world even using their mobile device. Documents are stored online as PDFs and accessible anytime, anywhere.

Benefits:

- Students, faculty, supervisors and advisors all save time by eliminating the need to collect physical signatures on paper.
- Built-in validation restricts access to people with a valid UCDAVIS.EDU email address and prevents wasteful spam and reduces errors.
- Applications are saved online as PDFs with access control. They're secure, easy to find and view anytime and easy to generate reports from.
