

Java Web Developer

Please note that US citizenship or Green Card is required. Relocation to Connecticut is not required.

frevvo Inc provides a business capable, cloud-based, secure, mobile-ready web forms and workflows automation platform. This platform enables companies to reduce paper use and achieve tangible savings by replacing manual processes with online forms and documents.

Our team consists of sharp, analytical minds who enjoy solving operational and technical challenges for businesses of all sizes. As a member of the frevvo team, you will help provide superior products, services and customer success.

Role

As a part of the product development team you will play a key role in architecture and software development of frevvo's next generation products. You are a highly motivated self-starter who is dedicated to developing products that achieve the highest level of customer satisfaction. You are comfortable in a fast-paced environment, have a deep understanding of and comfort working with a wide variety of web based technologies. This is a "hands-on" position and you have strong implementation skills. The ideal candidate possesses a strong desire to build great products to exacting quality standards using the latest technology and design techniques that go well beyond customer expectations.

Responsibilities

- Architect, Design and Develop key new software components.
- Work with other development team members to ensure release milestone content is delivered on schedule and with high quality.
- Mentor and train other development team members in technology and design techniques as necessary.
- Work closely with the Quality Assurance team to ensure the highest product quality.
- Work closely with the Customer Support team and periodically provide direct support to customers and users.
- Utilize entrepreneurial skills to develop processes that contribute to workplace and team improvements.
- Occasionally troubleshoot operational and deployment issues with frevvo's software.

Required Experience

- BS degree in Computer Science or Engineering.
- At least 3 years of software development experience.
- Strong experience in Java software development.
- Strong experience in web technologies: XHTML, HTML5, CSS and JavaScript.
- Solid understanding of object oriented concepts.

Strongly Desired Experience

- At least 6 years of software development experience, at least 4 years in Java software development.
- Experience using Eclipse for Java and/or web development.
- Experience with XML, XSLT, XML Schemas.
- Experience with tools to enhance the development process such as Jenkins, XUnit, etc.

Additional Desirable Experience

- Experience in Microsoft .NET.
- Hibernate, Ajax, Tomcat, Apache, Eclipse EMF, Database (MySQL, SQL Server, Oracle, DB2), Maven, Subversion.
- Experience using the Spring Framework is a plus.
- Experience with the Linux Operating Systems, including shell scripting.
- Experience with Atlassian Confluence (especially Confluence plugin development).
- Experience with AWS (VPC, EC2, S3, RDS, CloudWatch) with bonus points for related certifications.
- Experience with Jenkins or other continuous integration tools.
- Experience with Docker with bonus points for Kubernetes or Cloud Foundry
- Experience with Git, Apache, Linux Operating Systems, SQL

Benefits and Perks

- Competitive Salary
- Bonus Plan
- Stock Options
- Medical, Dental and Vision for you and your family
- 3 week PTO for new hires
- Retirement Plan with company match
